AI ADVISOR & FORWARD DEPLOYED ENGINEER · SENIOR IT TRANSFORMATION LEADER

Filip Truyens

IT transformation leader with more than thirty years of experience in the private and public sectors. Today I advise on AI and, as a Forward Deployed Engineer, build it on site with the client, under my own banner: Fender ICT · AI Advisory.

33+	20	16
years in IT, since April 1993	employers and clients	certifications earned

Profile

I lead change in organizations that cannot afford to get it wrong: banks, insurers and government. That is where technology, governance and risk meet, in public cloud, in security and today also in AI.

I turn strategic objectives into a program that delivers: a roadmap, a budget and people who know what to do next. I stand between the people who decide and the people who build. My job is to get everyone aligned before the assignment starts.

Since late 2025 I also build solutions myself, with the help of AI. That is how I deliver my work today: what used to take weeks of analysis and documentation now takes days. It leaves time for what cannot be automated: consultation and human contact.

AI Advisory

Advice	**AI advice** Where AI fits and where it does not, what it may and may not do, and how it stays within the rules for security, privacy and audit. That way management decides with the facts on the table.
Co-creation	**Forward Deployed Engineer** I work at the client, in their environment and alongside their people, and build until the solution runs. After that they can manage it and take it further themselves.
First client	**Puur Reizen** A travel agency: customer portal and back office on Odoo, built and tested in a few days with AI agents.

What I built with AI

2025 – 2026

Working software, built by me with the help of AI.

2025 – present

Own project

Personal AI operating system

My own AI working environment, which I built and use every day.

- A growing library of skills, a memory system and AI agents I configure myself, for research, software and documentation.
- Works with Claude Code and with Codex, with the same skills on both sides.
- This site was built with it: one source for three languages, with the PDFs generated automatically.

Technology: Claude Code, Codex, Python, JavaScript, Markdown

Oct 2026

Puur Reizen

Customer portal and back office on Odoo for Puur Reizen

For a travel agency: customers, trips, documents and invoices in one place, built on standard software.

- Customers see their own trips, the itinerary from Wetu, what is still missing and what is still due, and upload their travel documents themselves.
- The agency follows every trip on a kanban board per status, raises deposit, balance and extra invoices, and sends them through Peppol or Billit.
- Nothing goes out without a check: reminders and status changes are proposals that a staff member confirms. An AI assistant gets read-only access and never sees identity documents.
- Built and tested in a few days with AI agents: four modules for Odoo 20, a branding module and **115 automated tests**.

Technology: Odoo 20, Python, PostgreSQL, Odoo.sh, Peppol, Billit API, Wetu API

Jul 2026

Smals

Resource Capacity Planner

One shared, live view of which teams are stretched and which are not.

- Sets operational load against project work for **some forty technical teams**, at three levels: team lead, division head and the Office of the CTO.
- From data model to live dashboards, running in production on Google Cloud.
- Replaced a set of manually maintained spreadsheets that nobody fully trusted.

Technology: Python, SQLite, Google Cloud Run

Apr 2026

Smals

Automated NIS-2 and CyberFundamentals evidence factory

Compliance evidence for NIS-2 and the CCB's CyberFundamentals, collected automatically.

- Pulls configuration and control data from dozens of operational systems through their APIs and turns it into audit-ready reporting.
- **Weeks of manual work before every audit** became a repeatable run.
- I did the source research, the data model, most of the engineering and the testing myself, with AI agents as build partners.

Technology: Python, SQLite, Google Cloud Run

Sharing knowledge

2018 – 2026

Teaching, presenting and helping others get started.

Oct 2026	**Je hebt 2 jaar: AI for knowledge workers** One-day hands-on training I designed and teach. Participants build their own working AI operating system around one recurring task, from context engineering to automation. On 23 October 2026.
2023 – 2026	**Info sessions on public cloud and security** Smals · For the member institutions of social security and the federal government, often to large audiences.
2018 – 2021	**IT reporting for franchisees** Burger Brands Belgium · Regular presentations of IT achievements and the related costs at franchisee board meetings and regional meetings.

Expertise

What I know and use, grouped by domain.

Leadership and programs	Program and portfolio management · steering committees and reporting to C-level executives · budgets, CAPEX and OPEX · FinOps · suppliers and public tenders · teams of up to 25 people · interim IT management
Security and compliance	ISO 27001/27002 · ISAE 3402 · NIS-2 · CCB CyberFundamentals · NIST CSF · C2M2 · OWASP SAMM and ASVS · COBIT · GDPR · post-quantum cryptography
Cloud and infrastructure	Azure · AWS · Google Cloud · landing zones · Entra ID · VMware · Citrix · Red Hat OpenShift · Windows Server and Active Directory · SAN and NAS
AI and automation	AI agents and agentic workflows · Claude Code · Codex · LLM pilots · context engineering · Python · automated compliance evidence
Methods	PRINCE2 · ITIL v3 · DEMO · Scrum · PMBOK · BPMN · Cloud Adoption Framework
Tools	Jira · Confluence · Sciforma · ServiceNow · CA Clarity · HP PPM · Power BI · M365

Languages

Dutch	Native.
French	Bilingual. Four years of study in France (Angers and Paris) and the Diplôme Supérieur de Français des Affaires.
English	Full professional proficiency. Studied in Leeds and the daily working language in international programs.

Personality

Mar 2019	**Myers-Briggs Type Indicator (MBTI): ISFJ** MBTI profile, European edition (OPP) · Taken on 20 March 2019. ISFJ stands for Introversion, Sensing, Feeling and Judging. In plain words: quiet focus, starting from concrete facts, an eye for the people who will work with the result, and a preference for a plan and kept commitments.
